2. Data Enterprise Protection Server

The screenshot displays the Data Enterprise Protection Server console. On the left is a dark sidebar with navigation options: Home (red), Action, View, Help, Archive Manager, Storage (with sub-items: All Stores, All Store Groups, Disk Storage, Cloud Storage, Taps Storage), Local Plans, Saved Configurations, and Remote Computer. The main content area is titled 'Data Enterprise Protection Server' and features a notification bell with '7' alerts. Below the title is a storage overview section with a donut chart showing a total of 7.5 GB, broken down into: Disk Storage (3.4 GB), Network Drive (2.3 GB), Removable Disk (1.0 GB), and LTFS Drive (300 MB). To the right is a line graph showing storage usage over time from January to November, with a peak of 800 MB in July. Below the storage overview are three tabs: 'Archive Manager' (selected), 'Checkup Report', and 'Actions'. The 'Archive Manager' tab contains three sections: 'Storage' (with a descriptive paragraph), 'Local Plans' (with a descriptive paragraph), and 'Remote Computers' (with a descriptive paragraph). The 'Actions' panel on the right lists: Archive Manager, About Enterprise Protection Server, Edit License Keys, Save System Recovery Environment, Importing Settings, User Preferences, View, Refresh, Properties, and Help.

Storage

This Storage folder shows the storage devices and locations configured for use by the system. Prior to creating a protection plan, you will need to create a store or store group for storing your archived data.

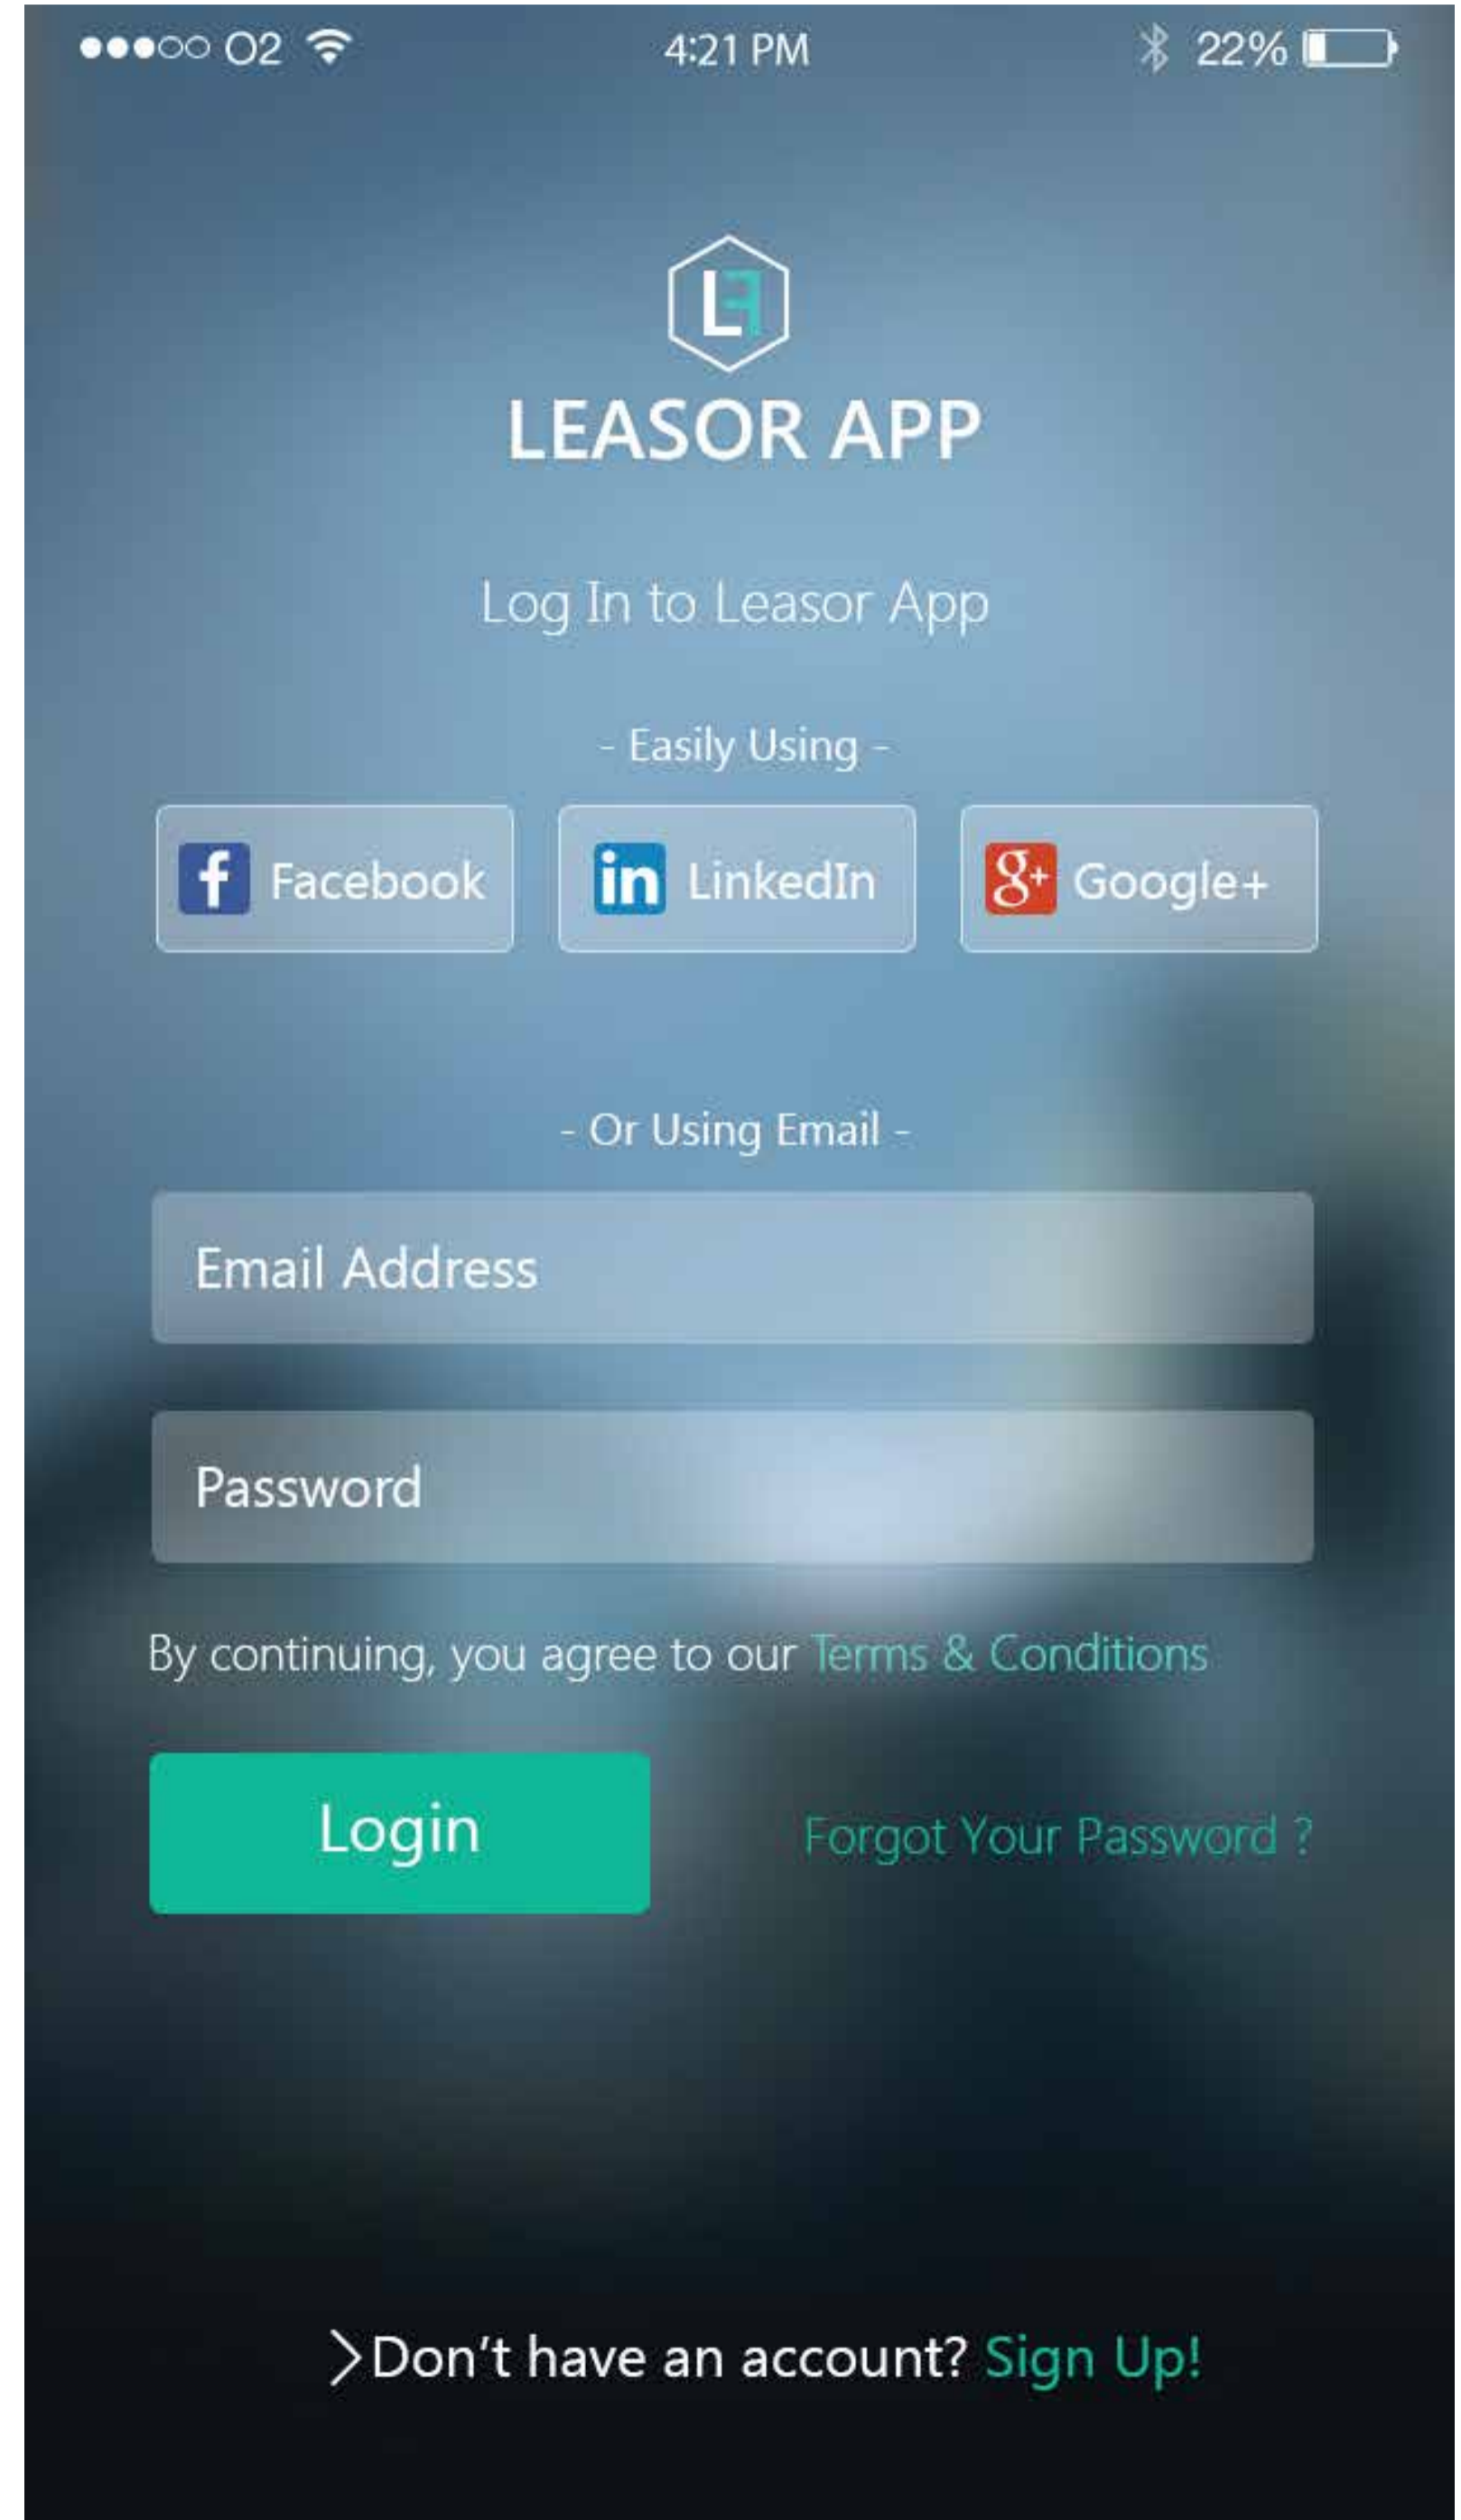

Local Plans

The Local Plans folder contains protection plans configured for protecting local data (versus data on remote computers). From here you can create and manage plans to protect local data.

Remote Computers

The remote computers folder contain the remote computers (clients) section of the console tree. This folder has an All Computer group underneath for adding your remote computers to this software.
