E Learning

- A system which can be utilized to understand how a normal person reacts to different situations.
- Set up many activities to identify and analyse the people reaction
- **Technologies:** AngularJs, Javascript, HTML5, CSS3,XML

The screenshot shows a web interface for a "Personality Assessment" module. At the top right, there is a "START OVER" button. The main content area is divided into two sections. On the left, under the heading "Self-Report Measures", there is a paragraph of text explaining that these measures are questionnaires used by psychologists to describe personality patterns, and that the user will take the Stewart Personality Inventory. On the right, there is a grid of 40 small portrait photos of diverse individuals. At the bottom of the interface, there is a navigation bar with "NARRATION: On" (with a speaker icon), "Replay" (with a circular arrow icon), and "Transcript" (with a document icon). To the right of this bar are "PREV" and "NEXT" navigation buttons with arrows.

PDToolkit Home FAQs Support

Welcome

We are pleased to introduce the PDToolkit, an online subscription-based resource that provides the tools that educators need to effectively plan and implement instruction.

Our tools will assist you in motivating and engaging your students to enable them to succeed.

Together with a Pearson textbook, the PDToolkit introduces technology integration by aligning text to online videos, resources, assessments, and more; specific to each chapter. The PDToolkit replaces previous CD-ROMs and DVDs once available with our textbooks and removes any download or program compatibility issues.

To request or renew access with a purchase order, please call (800) 848-9500 or email K12cs@custhelp.com

—*Please note the PDToolkit is an additional tool and is not required to begin implementing any of our books.

Interactive Learning Platform

- Mercedes L&P
- Full-fledged user manual for Mercedes L&P platform, This interactively shows the user how to effectively use the Mercedes L&P platform
- **Technologies:** Adobe Captivate, HTML, CSS etc.

Queensland Government

Queensland Rural and Industry Development Authority

- A set of portals for Queensland citizen to apply for
 - Disaster grant
 - Farm management grant
 - Fishing vessel grant
 - Solar scheme
- Interacts with Australian Government's RAPID 4 portal for various data validation and record keeping
- Technologies: Angular5, NodeJS, RedisDB, Mysql, Express JS

The screenshot shows the login page for the Queensland Rural and Industry Development Authority Grant & Loan Application Portal. At the top, there is a dark blue header with the Queensland Government logo and the text 'Queensland Government' on the left, and 'Sitemap | Contact | Help' on the right. Below the header, the main title 'Queensland Rural and Industry Development Authority Grant & Loan Application Portal' is displayed in large, bold, dark blue font. Underneath the title, a paragraph of text reads: 'If you have previously registered to use this Queensland Rural and Industry Development Authority Portal you can log in here to submit additional applications or review the status of a previously submitted application.' Below this text are two input fields: 'Email:' followed by a text box, and 'Password:' followed by a text box. A checkbox labeled 'Remember me' is positioned below the password field. A green 'Login' button is centered below the checkbox. At the bottom of the page, a dark blue footer contains a row of links: 'Copyright | Disclaimer | Privacy | Right to information | Accessibility | Jobs in Queensland Government'. Below these links, the copyright notice reads: '© The State of Queensland - Queensland Rural and Industry Development Authority 2017 Queensland Government'.

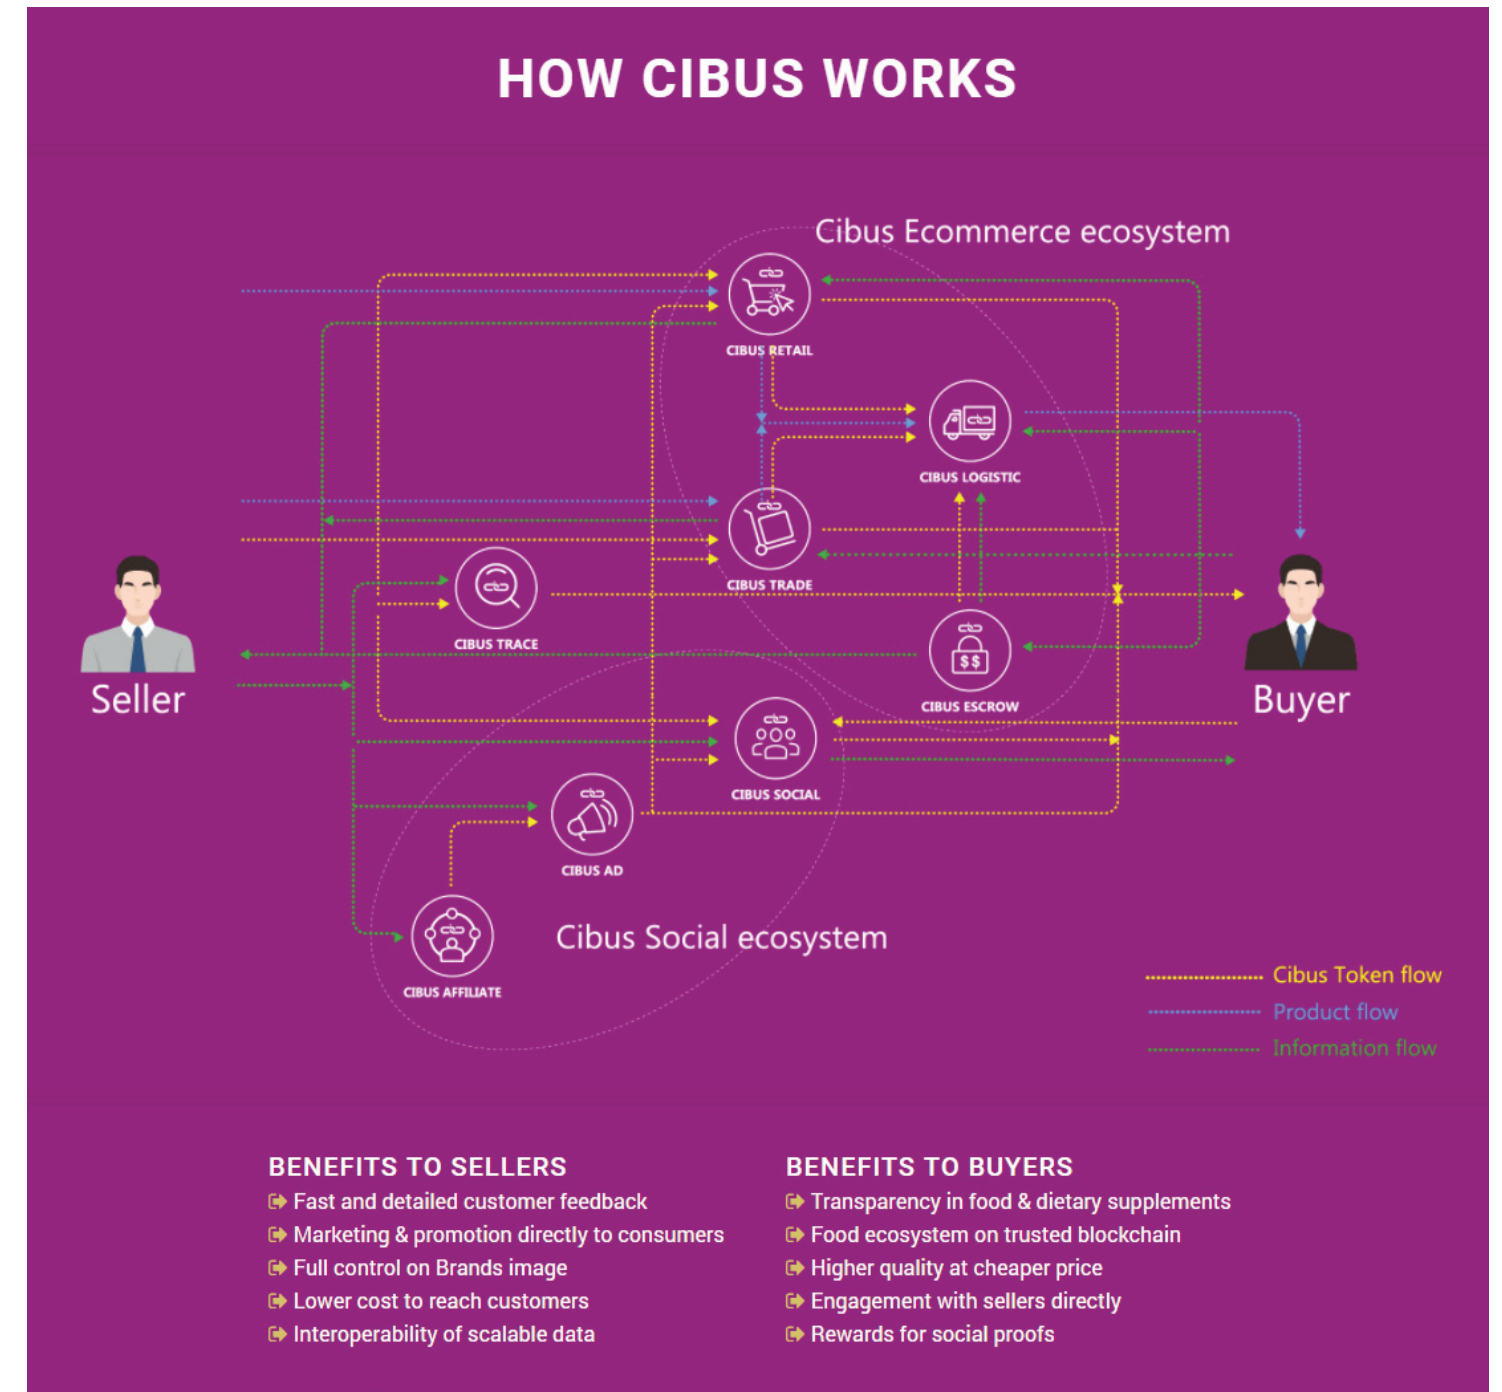

CIBUS

CIBUS is bringing Trust back into Food and Dietary Supplements segments with a new decentralized, blockchain based platform. CIBUS will help its users to track and transact food and dietary supplement products to ensure highest quality, trust, transparency, reliability, efficiency, security and full traceability, at lower cost. CIBUS will create end to end B2C & B2B ecosystem that will transform how we handle and consume food in future.

Client Testimonials

“ A pleasure to work with. The Project was actually delivered ahead of schedule. Regular scrum calls were clear and efficient. On budget and ahead of schedule. We will definitely work with them again.”

CEO, Option Away LLC- Chicago, US.

“To develop and enhance the current younglambeth.org website including all the backend functionality was always a daunting thought, let alone migrate from one provider to another and the infrastructure it was hosted on. And after careful consideration we engaged Fortusoft UK to take on this project.

We found Fortunesoft approach from the outset was first class, from the project management team right down to the developers themselves. They made the whole process as smooth as it could be and kept us informed all the way. Well done to all involved.”

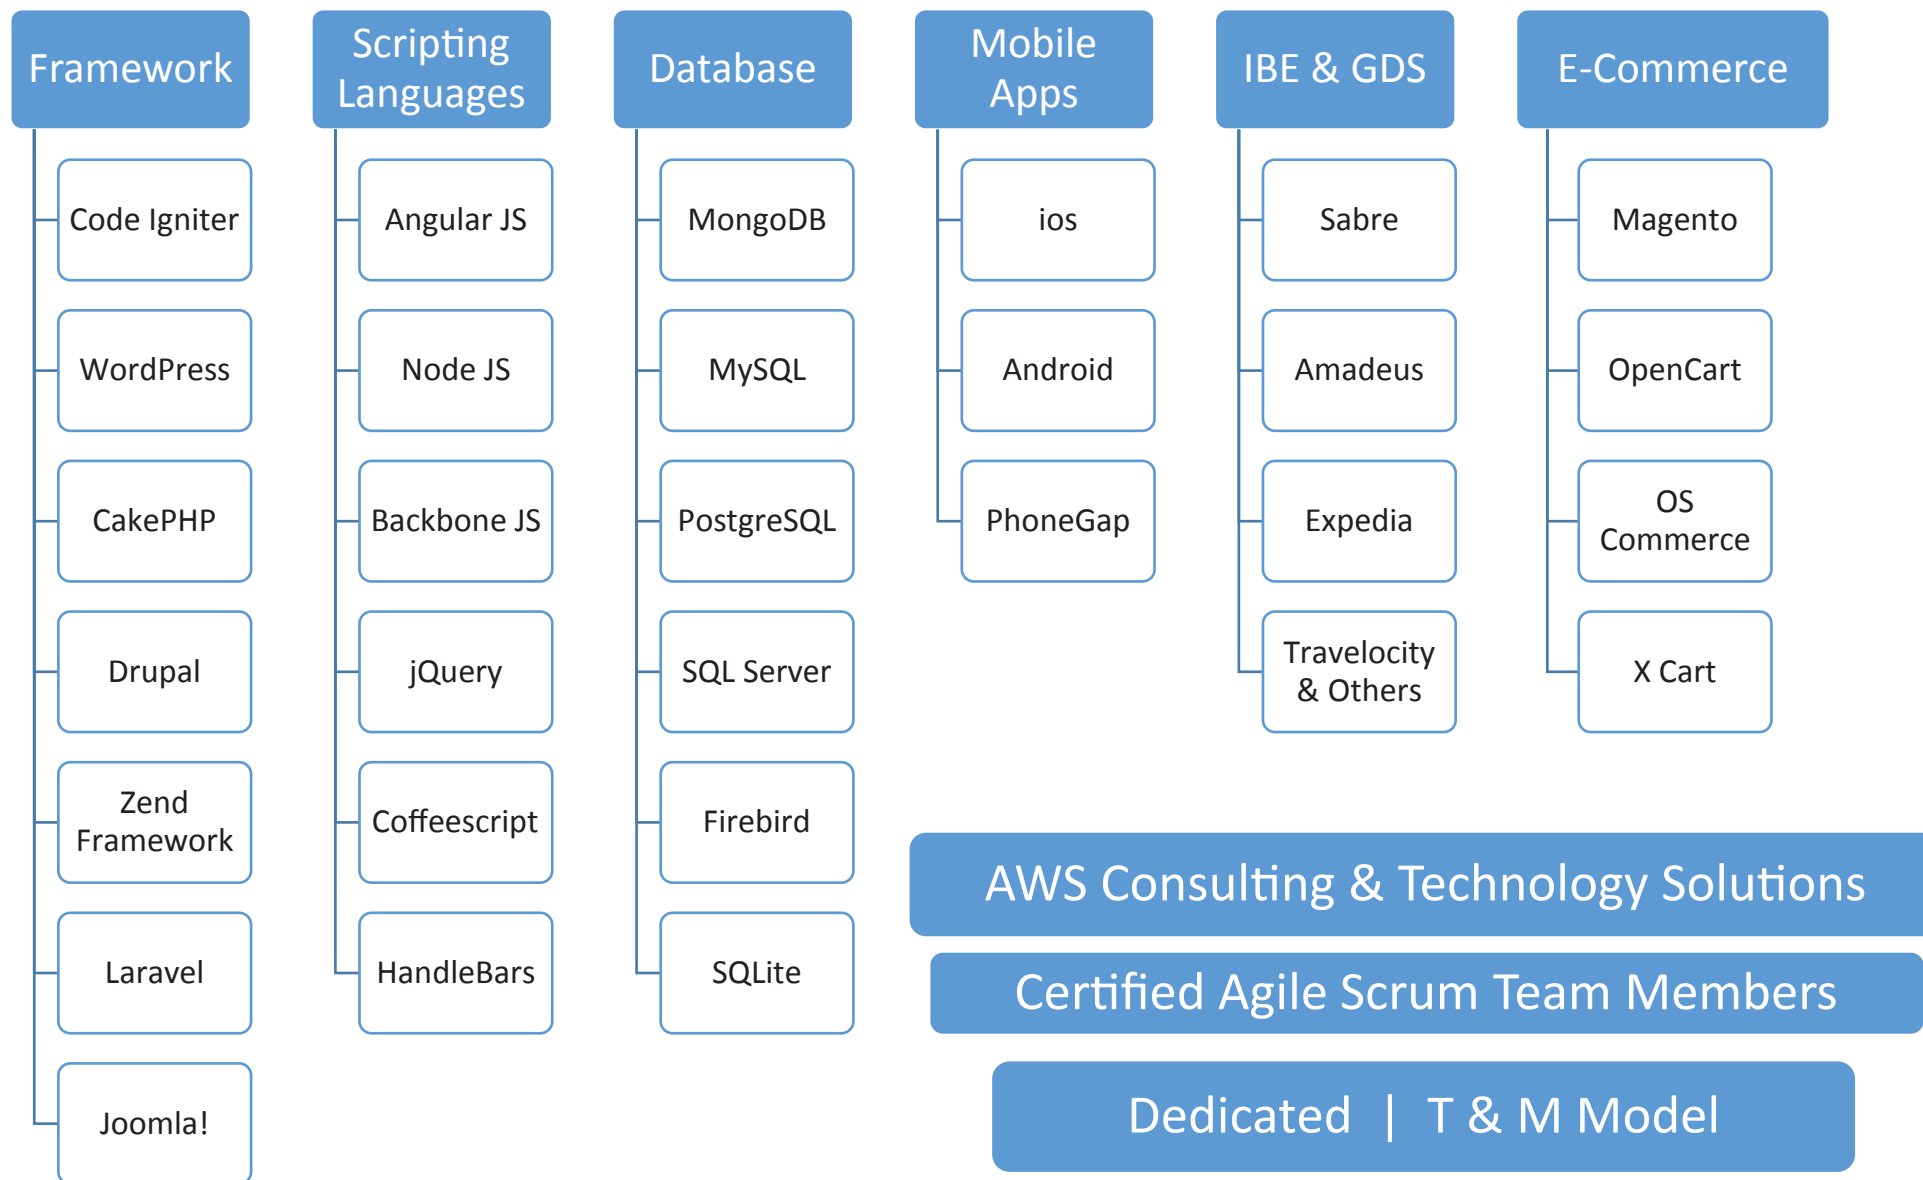

Veronica Javorova- Family Information Service and System Manager, London Borough of Lambeth, Greater London.

“ I really appreciate the team’s efforts. It has been a pleasure to see this project become a reality. My hope is that the website will then stand as a testament to all of the effort invested in it by so many people. Thank you again for all the support and assistance.”

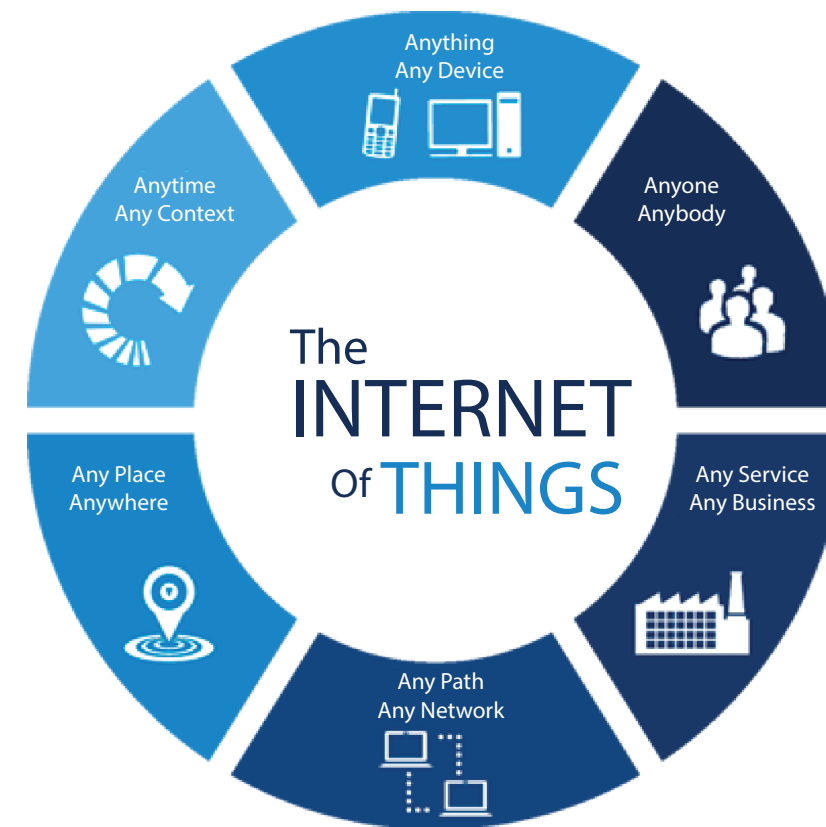

Katinka Csizmadi – Communications Assistant Manager,
Live Language, Glasgow, Scotland.

Blockchain – Ethereum based food traceability system

“What the internet did for communications, Blockchain will do for trusted transactions.”

- Ginny Rometty, Chief Executive IBM

- Blockchain is enormously powerful shared global infrastructure that can move value around and represent the ownership of property.
- create markets, store registries of debts or promises, move funds without a middle man or counterparty risk.
- Decentralized applications (dApps) are applications that run on a P2P network of computers rather than a single computer.
- Ethereum based food security and supply chain management ecosystem with ICO
