PDTOOLKIT   Home   FAQs   Support

Welcome

We are pleased to introduce the PDToolkit, an online subscription-based resource that provides the tools that educators need to effectively plan and implement instruction.

Our tools will assist you in motivating and engaging your students to enable them to succeed.

Together with a Pearson textbook, the PDToolkit introduces technology integration by aligning text to online videos, resources, assessments, and more; specific to each chapter. The PDToolkit replaces previous CD-ROMs and DVDs once available with our textbooks and removes any download or program compatibility issues.

To request or renew access with a purchase order, please call (800) 848-9500 or email K12cs@custhelp.com ❯

—*Please note the PDToolkit is an additional tool and is not required to begin implementing any of our books.*

Words Their Way: Word Study for Phonics, Vocabulary, and Spelling Instruction, 6/e

Client Testimonials

'' A pleasure to work with. The Project was actually delivered ahead of schedule. Regular scrum calls were clear and efficient. On budget and ahead of schedule. We will definitely work with them again."

CEO, Option Away LLC- Chicago, US.

"To develop and enhance the current younglambeth.org website including all the backend functionality was always a daunting thought, let alone migrate from one provider to another and the infrastructure it was hosted on. And after careful consideration we engaged Fortusoft UK to take on this project.
We found Fortunsoft approach from the outset was first class, from the project management team right down to the developers themselves. They made the whole process as smooth as it could be and kept us informed all the way. Well done to all involved."

Veronica Javorova- Family Information Service and System Manager, London Borough of Lambeth, Greater London.

" I really appreciate the team's efforts. It has been a pleasure to see this project become a reality. My hope is that the website will then stand as a testament to all of the effort invested in it by so many people. Thank you again for all the support and assistance."

Katinka Csizmadi - Communications Assistant Manager,
Live Language, Glasgow, Scotland.

Blockchain – Ethereum based food traceability system

"What the internet did for communications, Blockchain will do for trusted transactions."
- Ginny Rometty, Chief Executive IBM

○ Blockchain is enormously powerful shared global infrastructure that can move value around and represent the ownership of property.

○ create markets, store registries of debts or promises, move funds without a middle man or counterparty risk.

○ Decentralized applications (dApps) are applications that run on a P2P network of computers rather than a single computer.

○ Ethereum based food security and supply chain management ecosystem with ICO
